

Corning Union High School District

Statewide Testing Notification

California students take several mandated statewide tests. These tests provide parents/guardians, teachers, and educators with information about how well students are learning and becoming college and career ready. The test results may be used for local, state, and federal accountability purposes.

The California Assessment of Student Performance and Progress (CAASPP) tests consist of the following:

- **Smarter Balanced Assessment Consortium Assessments**

The Smarter Balanced computer adaptive assessments are aligned with the Common Core State Standards (CCSS). English language arts/literacy (ELA) and mathematics tests are administered in grades three through eight and grade eleven to measure whether students are on track to college and career readiness. In grade eleven, results from the ELA and mathematics assessments can be used as an indicator of college readiness.

- **California Science Tests (CAST)**

The computer-based CAST measures students' achievement of the California Next Generation Science Standards (CA NGSS) through the application of their knowledge and skills of the Science and Engineering Practices, Disciplinary Core Ideas, and Crosscutting Concepts. The CAST is administered to all students in grades five and eight and once in high school (i.e., grade ten, eleven, or twelve).

- **California Alternate Assessments (CAAs)**

Only eligible students—students whose individualized education program (IEP) identifies the use of alternate assessments—may participate in the administration of the CAAs. Test examiners administer the computer-based CAAs for ELA, mathematics, and science one-on-one to students. Students in grades three through eight and grade eleven will take the CAA for ELA and mathematics. Test items developed for ELA and mathematics are aligned with the CCSS and are based on the Core Content Connectors.

Students in grades five and eight and once in high school (i.e., grade ten, eleven, or twelve) will take the CAA for Science. The CAA for Science embedded performance tasks are based on alternate achievement standards derived from the CA NGSS.

Pursuant to California *Education Code* Section 60615, parents/guardians may annually submit to the school a written request to excuse their child from any or all of the CAASPP assessments.

English Language Proficiency Assessments for California

Students entering the California education system for the first time who do not meet the criteria as English Only students must take the Initial English Language Proficiency Assessment for California (ELPAC). This assessment determines if the student qualifies as Initial Fluent English Proficient (IFEP) or is placed in an English Language Development curriculum. Federal Law dictates that any student who initially identified as an English Learner must be assessed annually until they are Reclassified Fluent English Proficient (RFEP). This assessment is called the Summative ELPAC and is administered annually between February 1 and May 31. This assessment identifies the student's English language proficiency level and measures their progress in learning English.

Physical Fitness Test

The physical fitness test for students in California schools is the FitnessGram®. The main goal of the test is to help students in starting lifelong habits of regular physical activity. Students in grades five, seven, and nine take the fitness test.
